**AQUILA CONTINUES TO EXPAND MASSIVE SULFIDE ZONES**

**AQUILA RESOURCES INC. (TSX-V:AQA – Frankfurt: JM4A) (“Aquila” or the “Company”)** is pleased to announce results from three (3) additional drill holes from the Back Forty Project in the Upper Peninsula of Michigan.

Drill hole LK-86 was a 30 meter and 40 meter step out from two previous intersections of Main Zone massive sulfides (see South Limb long section at [www.aquilaresources.com](http://www.aquilaresources.com)). It successfully intersected two zinc rich lenses of the Main Zone. Drill hole LK-87 targeted the Tuff Zone 40 meters and 50 meters down dip and along strike respectively from previously drilled holes (see Tuff Zone long section), and encountered 6.5 meters of massive sulfide.

Drill hole LK-85 was a step out to the east of a previous gold intercept in siliceous sediments, and intersected only minor mineralization.

Hole #	(m) From	(m) To	(m) Interval	(m) est. true	Gold g/tonne	Silver g/tonne	Copper %	Zinc %	Unit
LK-86	263.58	271.6	8.06	7.50	1.02	12.09	0.14	13.97	Main Zone Massive Sulfide, Upper Lens
	283.95	297.4	13.45	12.51	2.97	32.28	0.31	12.04	Main Zone Massive Sulfide, Lower Lens
LK-87 Includes	316.9	323.9	7.04	6.55	0.99	19.85	0.04	5.84	Tuff Zone Massive Sulfide
	320.67	323	2.33	2.17	0.55	7.43	0.03	12.73	Tuff Zone Massive Sulfide
LK-85	77.5	84.5	7.00	unknown	0.27	8.32	0.01	1.15	Chloritic Tuff

Sample preparation and assays on split core submitted by Aquila were completed by ALS Chemex Labs in Thunder Bay, Ontario and Vancouver, BC. Trace elements excluding gold were analyzed by ICP emission spectrometry with “ore grade” analyses conducted on heavily mineralized samples and samples exceeding upper reporting limits for the ICP package. Gold was analyzed by fire assay fusion with atomic absorption finish, with samples exceeding 3 parts per million gold re-run with fire assay fusion and gravimetric finish. Standards were inserted in the sample stream and check analyses performed on select samples.

A total of 96 drill holes have been completed to date at the Back Forty Project, with results for holes LK-88 through LK-90 expected shortly. A second drill is being mobilized to the property with drilling ongoing. The Company will be updating the website with additional informational graphics including a plan view of the area of existing 43-101 compliant resource, as well as the mineralized zones on the recently acquired MRT Property.

Thomas O. Quigley, P. Geo., is the qualified person as defined in National Instrument 43-101, and is responsible for the information contained in this news release.
